bootstrap drop down

no select tag for these drop down.

const value=await option.textContent();

and **const value=await option.innerText()**

both of them get the text content.

```
1 test('Bootstrap dropdown without select tag', async ({page}) =>{
2     await page.goto('https://www.jquery-az.com/boots/demo.php?ex=63.0_2')
3
4     await page.locator('.multiselect').click() // click on the dropdown
5
6     //1
7     //const options=await page.locator('ul>li label input')
8     //await expect(options).toHaveLength(11);
9
10    //2
11    //const options=await page.$$('ul>li label input')
12    //await expect(options.length).toBe(11)
13
14    //3 select options from dropdown
15    /*const options=await page.$$('ul>li label')
16    for(let option of options)
17    {
18        const value=await option.textContent();
19        //console.log("value is",value)
20        if(value.includes('Angular') || value.includes('Java'))
21        {
22            await option.click()
23        }
24    }*/
25
26    // delect options
27    const options=await page.$$('ul>li label')
28    for(let option of options)
29    {
30        const value=await option.textContent();
31        //console.log("value is",value)
32        if(value.includes('HTML') || value.includes('CSS'))
33        {
34            await option.click()
35        }
36    }
37
38 }
39
40
41 await page.waitForTimeout(5000);
42 })
```
