How To Retry Failed Test Cases | Retries and Test Flakiness

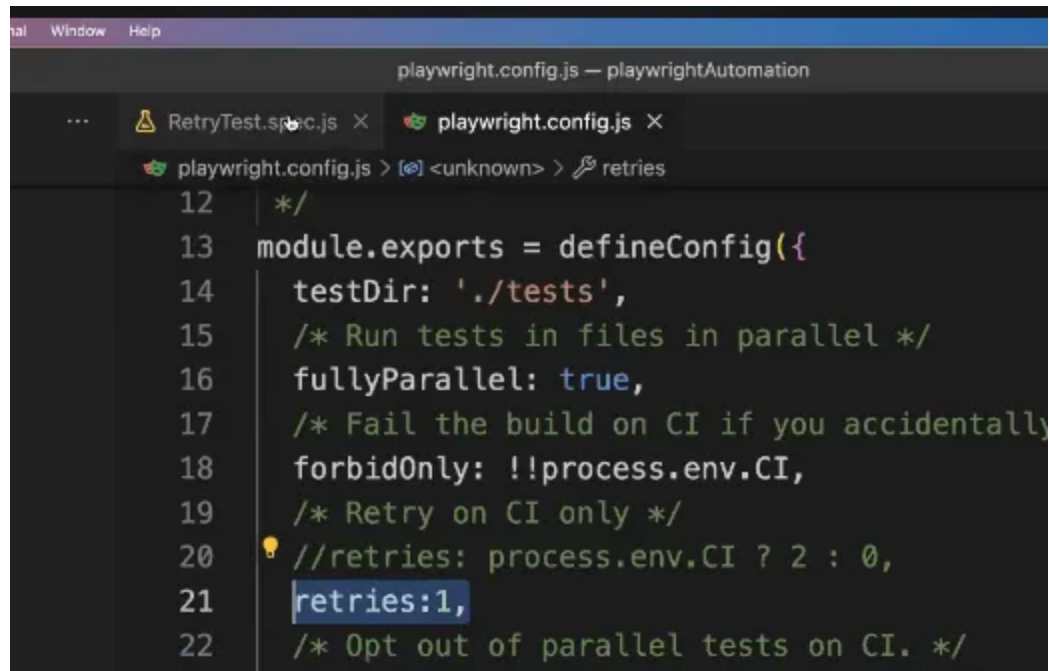

```
11  
12 # Give failing tests 3 retry attempts  
13 npx playwright test --retries=3  
14
```

change in pw config-

The screenshot shows a code editor with the file 'playwright.config.js' open. The editor has a dark theme. The file content is as follows:

```
12  */  
13  module.exports = defineConfig({  
14    testDir: './tests',  
15    /* Run tests in files in parallel */  
16    fullyParallel: true,  
17    /* Fail the build on CI if you accidentally have test.only in the source code. */  
18    forbidOnly: !!process.env.CI,  
19    /* Retry on CI only */  
20    //retries: process.env.CI ? 2 : 0,  
21    retries: 1,  
22    /* Opt out of parallel tests on CI. */
```

The screenshot shows a VS Code editor window with the file 'playwright.config.js' open. The file content is as follows:

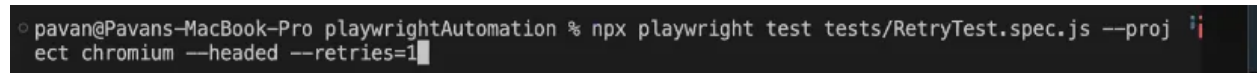

```
12  */
13  module.exports = defineConfig({
14    testDir: './tests',
15    /* Run tests in files in parallel */
16    fullyParallel: true,
17    /* Fail the build on CI if you accidentally
18    forbidOnly: !!process.env.CI,
19    /* Retry on CI only */
20    //retries: process.env.CI ? 2 : 0,
21    retries:1,
22    /* Opt out of parallel tests on CI. */
```

The line `retries:1,` on line 21 is highlighted with a blue selection background.

retry works when we run from cmd not that extension.

seems like extension not stable enough.

retry for specific file using cmd not from pw config-

The terminal shows the following command being executed:

```
pavan@Pavans-MacBook-Pro playwrightAutomation % npx playwright test tests/RetryTest.spec.js --proj  
ect chromium --headed --retries=1
```
